Project: Step 2

Based on the feedback that you have received on your potential projects by the teachers and your fellow students, pick the project that has the best potential for further development.

In this assignment, you are going to write the introduction for your project/proposal, based on specific readings and format.

Submit your introduction (and abstract, as updated from the previous assignment with the new ideas) on OLAT as a single two PDF file, formatted according to the provided latex template. Deadline: Tuesday, Nov 17 at 17:00.

Steps

1. Download the content of the folder `writing resources` in the `Content` section in OLAT.

2. Read the documents that you find inside in the following order:

   - `vanDeursen-writing_papers.pdf`
   - `le_goues-writing_advice.pdf`
   - `mcmillan-paper_writing.pdf`
   - `spinellis-writing_latex_docs.md` These resources will be very useful for your bachelor/master thesis as well--keep them somewhere safe.

3. Unpack the archive `latex-template.zip` and make sure you can compile the main document (e.g., try to change the authors with your names)

4. Write the introduction according to the suggestions given in the previous documents that you have read, particularly `vanDeursen-writing_papers.pdf` and `mcmillan-paper_writing.pdf`.

5. Update the abstract, using the structured abstract format.

6. Compile everything and submit it to OLAT before the deadline.
